GRADUATE PROGRAMS IN

TECHNOLOGY INNOVATION MANAGEMENT

timprogram.ca

SHAPE YOUR FUTURE BASED ON YOUR RESEARCH INTERESTS

Are you wondering:

- how to create and grow a new technology company?
- how to grow your existing company?
- how to internationalize your technology company rapidly?
- how to achieve a more senior corporate leadership role?
- how to build credentials and gain expertise for your next career move?

Then the Technology Innovation Management (TIM) graduate degree program is for you.

THE PROGRAM

The TIM program, a joint initiative of the Sprott School of Business and the Faculty of Engineering and Design, offers three different degrees in Technology Innovation Management.

The Master of Applied Science (MASc) degree is thesis-based. Students undertake original research under the supervision of an experienced faculty member.

The Master of Engineering (MEng) degree is project-based. Students employ applied research to solve a client problem.

The Master of Entrepreneurship (MEnt) degree is also project-based. Students employ applied research to improve the health of the business ecosystems that deliver specialized services to founders of new companies or new lines of business at existing companies.

All of our students undertake the majority of their coursework in an informal face-to-face university setting. Occasional group study sessions and lectures use our BigBlueButton conferencing system. All TIM courses take place in the evening, making the TIM program ideal for busy people.

CAPITAL ADVANTAGE

At Carleton, we actively practise entrepreneurship instead of just talking about it. The TIM program is an important component of Carleton's entrepreneurial focus. We offer several opportunities for advanced learning, including internships with other TIM-based businesses, involvement with Carleton-based projects that build new platforms and systems and in depth access to the flagship TIM Review online journal (**timreview.ca**) and TIM Lecture Series.

We also provide our students and graduates with access to unique resources in Canada's Capital Region including Lead To Win (**leadtowin.ca**), ranked by UBI Global as one of the top 10 university business incubators in North America, the Carleton-led Accelerator, and the VENUS Cybersecurity Corporation (**venuscyber.com**).

Canada's Capital University

ADMISSION REQUIREMENTS

The normal requirement for admission to the master's program is a bachelor's degree in engineering, business, or science, with at least high honours standing.

Candidates are normally required to have two years of technical work experience prior to admission.

Candidates applying for admission with degrees in other areas will be considered by the admissions committee. The committee is responsible for establishing criteria for degree equivalencies.

REQUIRED DOCUMENTS

You will need to provide the following documents:

- Two letters of reference
- A Statement of Intent (explaining why you are interested in TIM and why we should consider you)
- A copy of transcripts from all post-secondary institutions you have attended
- If applicable, a copy of current English-language test results
- A curriculum vitae that details your work experience

Note: Official documents (transcripts, test scores) will be required if you are accepted into one of our programs.

TIM student Ewan Reid created an Ottawa-based company "Mission Control Space Services"

APPLICATION & DEADLINES

For more information about our program(s), please visit our website: **timprogram.ca**.

Details about how to apply are available here: **graduate.carleton.ca/apply-online**.

You can access an online application at this website: **graduate.carleton.ca/applynow**.

Applicants can apply fall and winter terms. The fall application deadline date, to be eligible for funding, is **March 1** of the same year.

Each month more than 27,000 people worldwide read the TIM Review, a free monthly publication about theories, strategies, and tools that help technology companies succeed (**timreview.ca**).

TIMProgram

This document is available in a variety of accessible formats upon request. A request can be made on the Carleton University website at: carleton.ca/accessibility/request.

BigBlueButton, the world's #1 open source web conferencing system, originated in 2007 as a student project within the TIM program. Today, BigBlueButton is a global success at universities and colleges all over the world (**BigBlueButton.org**).

LANGUAGE REQUIREMENTS

For admission into Carleton's graduate programs, you will need to demonstrate that your knowledge and use of English are strong enough for graduate studies at an English-language university. For a listing of our minimum English-language requirements, please visit our website at: **graduate.carleton.ca/international**

FINANCIAL ASSISTANCE

Generous funding may be available in the form of research assistantships and scholarships based on academic excellence. We encourage students to compete for scholarships from OGS or NSERC. Applicants who apply after March 1 for the fall term may be considered for funding, if funding is available. For additional information on scholarships visit: **graduate.carleton.ca/financial-assistance**

More than one third of our graduates leave with a degree and a brand new technology company.
